SUMMARY

Computer Science graduate with hands-on experience in full-stack development using React Native, React.js, Node.js, and .NET technologies. Built and deployed real-world mobile and web applications, including a real-time ride-sharing Android app and an ASP.NET MVC platform, and currently seeking a junior developer or internship opportunity in Rawalpindi/Islamabad.

EDUCATION

Bachelor of Computer Science

2022-2026

Arid Agriculture University, Rawalpindi

CGPA: 3.5 / 4.0

Honors: Awarded merit-based scholarship on grade basis

SKILLS

Frontend: React Native, React.js, HTML5, CSS3, JavaScript, Tailwind CSS

Backend: Node.js, Express.js, C#, RESTful APIs

Database: Microsoft SQL Server, PostgreSQL

Concepts: JWT Authentication, State Management, CRUD Operations, API Integration, MVC Architecture

Tooling: Git, GitHub, VS Code, Visual Studio, Redux Toolkit, Postman, Figma

PROJECTS

Car Ride Sharing – Android Mobile Application

Final Year Project

Tech Stack: React Native | C# .Net | Microsoft SQL Server | RESTful APIs

- Developed a full-stack Android ride-sharing application using **React Native**, **C# (.NET)**, and **Microsoft SQL Server**, building **RESTful APIs** for ride creation, booking, and driver-passenger management across multiple user roles.
- Implemented location-based ride-matching logic and optimized **SQL queries** to improve ride allocation efficiency while preventing duplicate seat bookings and handling concurrent ride requests.
- Designed a dynamic **fare-splitting** system that calculates and distributes fuel costs among passengers based on travel distance, improving affordability and supporting shared transportation.

Naat Khuwaan – Web Application

Tech Stack: C# | ASP .NET MVC | Microsoft SQL Server

- Developed a web application using **C#** with the **ASP.NET MVC** framework, implementing user signup/login, dynamic content management for Naat uploads, and structured searching/listing/filtering of reciters with their respective content using **Microsoft SQL Server** database.
